

Enriched Uniprot Keywords  
**Linear response to temperature**  
*and pH interaction effect*

Protein transport  
 Lipid metabolism  
 ER-Golgi transport  
 Fatty acid metabolism  
 Translocation  
 mRNA splicing  
 Lipid biosynthesis  
 Transport  
 Tricarboxylic acid cycle  
 Electron transport  
 Prostaglandin biosynthesis  
 Porphyrin biosynthesis  
 Respiratory chain  
 Fatty acid biosynthesis  
 DNA replication  
 mRNA processing  
 Protein biosynthesis  
 Steroid metabolism  
 Sterol metabolism  
 Cholesterol metabolism  
 DNA integration  
 Cell adhesion  
 DNA recombination  
 Neurogenesis  
 Endocytosis

Change with temperature

$-\log_{10}$  P-value
