

A word cloud of biological terms. The words are arranged in a roughly circular shape. The word 'lipid' is the largest and is in the center. 'glycosylation' is the second largest and is to the left of 'lipid'. 'metabolic' is below 'glycosylation'. 'protein' is below 'metabolic'. 'biosynthetic' is above 'lipid'. 'spermatogenesis' is above 'biosynthetic'. 'glycosphingolipid' is to the left of 'lipid'. 'galactosylceramide' is below 'glycosphingolipid'. 'carbohydrate' is below 'galactosylceramide'. 'wax' is to the right of 'lipid'. 'ether' is to the right of 'metabolic'. 'storage' is below 'ether'. 'ganglioside' is below 'protein'.

spermatogenesis
biosynthetic
glycosphingolipid
galactosylceramide
carbohydrate
lipid
wax
glycosylation
metabolic
ether
storage
protein
ganglioside
